Testers information

Please indicate the categories tested by highlighting them in the summary

Your name: **Petra Noskova**

Your society: **DILIA**

The date and time you perform the test cases: **6/9/2023 10-12 and 14-16:30 (pages 5 – 22), 8/9/2023 10-13:30 and 14:30-15:20**

The web browser you use to perform the test cases: **Google Chrome**

Remarks from Petra Noskova - DILIA

I have several comments to the search by title:

- some special characters are missing, so the search by title is not working well – e.g. Hoří, má panenka can be found only with the IDA ref. or under the title HOI MA PANENKO; Arabela se vrací aneb Rumburak králem říše pohádek is found under ARABELA SE VRACI ANEB RUMBURAK KRALEM ISE POHADEK

- the offer of the search list is too general and not giving a good reply – e.g. search of the series Arabela – I can see 10 first titles Arabela without having chance to scroll down even though this word Arabela is included into other titles (e.g. Arabela se vrací – ARABELA SE VRACI in the new search browser)

- search by title (full word) – it shows also the titles larger than the chosen word (e.g. Arabela – it found also the titles like Arabela se vrací aneb ...); I miss the possibility of the search by precise title – then I would have only titles with the chosen word, it means the Master and the Feature film

- the ordering by title in the search result list is not working well for the series with season and episode ref/ episode title

the work details page is displayed well but the link type of episodes to their master; it is the opposite of the reality 😊

- the season and the episode ref/ episode title is not displayed in the part of links;

- the part of Logs is displaying the User but not the society – I think it is important

- why the shares of A and B rights are sometimes orange (e.g. IDA ref. 132070536002) and sometimes not (IDA ref. 031200169209 or 031200172042)? Is it because of the missing A rights?

- when I am on the filtered list of works and I click on one of them for looking at the details and then I want to look to the details of one of the participants in IPI, I am not able to return to the initial list of works and must go to the home page and do the filter again; this is solved well on IDA old by opening a pop up window with details on IPI
